

Biostatistician (f/m/d)

The Cardio-CARE research group, Medicine Campus Davos, Switzerland, a program by the Kühne Foundation, is searching for one highly motivated

Biostatistician (f/m/d)

for ambitious collaborative projects in cardiovascular disease. You will participate in the statistical analysis of several cohort studies and randomized controlled trials in close collaboration with the Department of Cardiology from the University Medical Center in Hamburg and the Hochgebirgsklinik Davos. Our group is also involved in machine learning projects and provides opportunities to work on projects in diverse topics.

What Is Special About Davos?

Davos is the largest resort in the Alps for mountain holidays and sports. It is at 1560 m, the highest town in the Alps, and has one of Switzerland's biggest ski resorts. In winter, you can enjoy more than 300 km of slopes, and in summer, explore 700 km of hiking trails. Davos is the traditional host of the World Economic Forum as well as the Spengler Cup, the oldest international hockey tournament.

What Would Be Your Main Responsibilities?

- You perform statistical analysis of data from epidemiological studies and clinical trials.
- You provide statistical expertise for biomarker discovery.
- You participate in study protocol writing.
- You participate in the publication of research findings.
- You perform your own methodological research.

Why We Want You To Join Our Team?

- You are a proactive and independent thinker with a Ph.D. or M.Sc. in Biostatistics, Statistics, Mathematics, or similar.
- You have sound and solid knowledge of theoretical and applied statistics, preferably with an interest in Bayesian statistics.
- You are familiar with R and/or SAS.
- You are experienced in analyzing data from epidemiological studies or clinical trials.
- You are enthusiastic and passionate about science.
- You love to communicate, collaborate, connect different scientific disciplines, and contribute to multidisciplinary teams.

Why Would You Want To Join Our Team?

- You want to be an important researcher who is critical in expanding a research infrastructure.
- You want to pursue meaningful international research projects at the highest level.
- You value our many possibilities for personal and professional growth.
- You want to work with rich and diverse datasets.
- You want to work in a collaborative and inspiring team.
- We are happy to provide help and assistance to our employees, their spouses, and family members in terms of relocation procedures.

Interested?

We look forward to receiving your application, which should include a brief explanation of why you are the ideal candidate for this position, your detailed curriculum vitae, and the contact details of 2-3 referees. The call will remain open until the position is filled, and we will contact candidates on a rolling basis.

Your application should be sent as a single PDF file containing all your application documents to info@cardio-care.ch.
